Hall: 14/15

THE VOLTA ZERO IS BACK

- The Volta Zero is a game changing electric truck for urban deliveries. It offers best in class maneuverability, safety and operational efficiency.

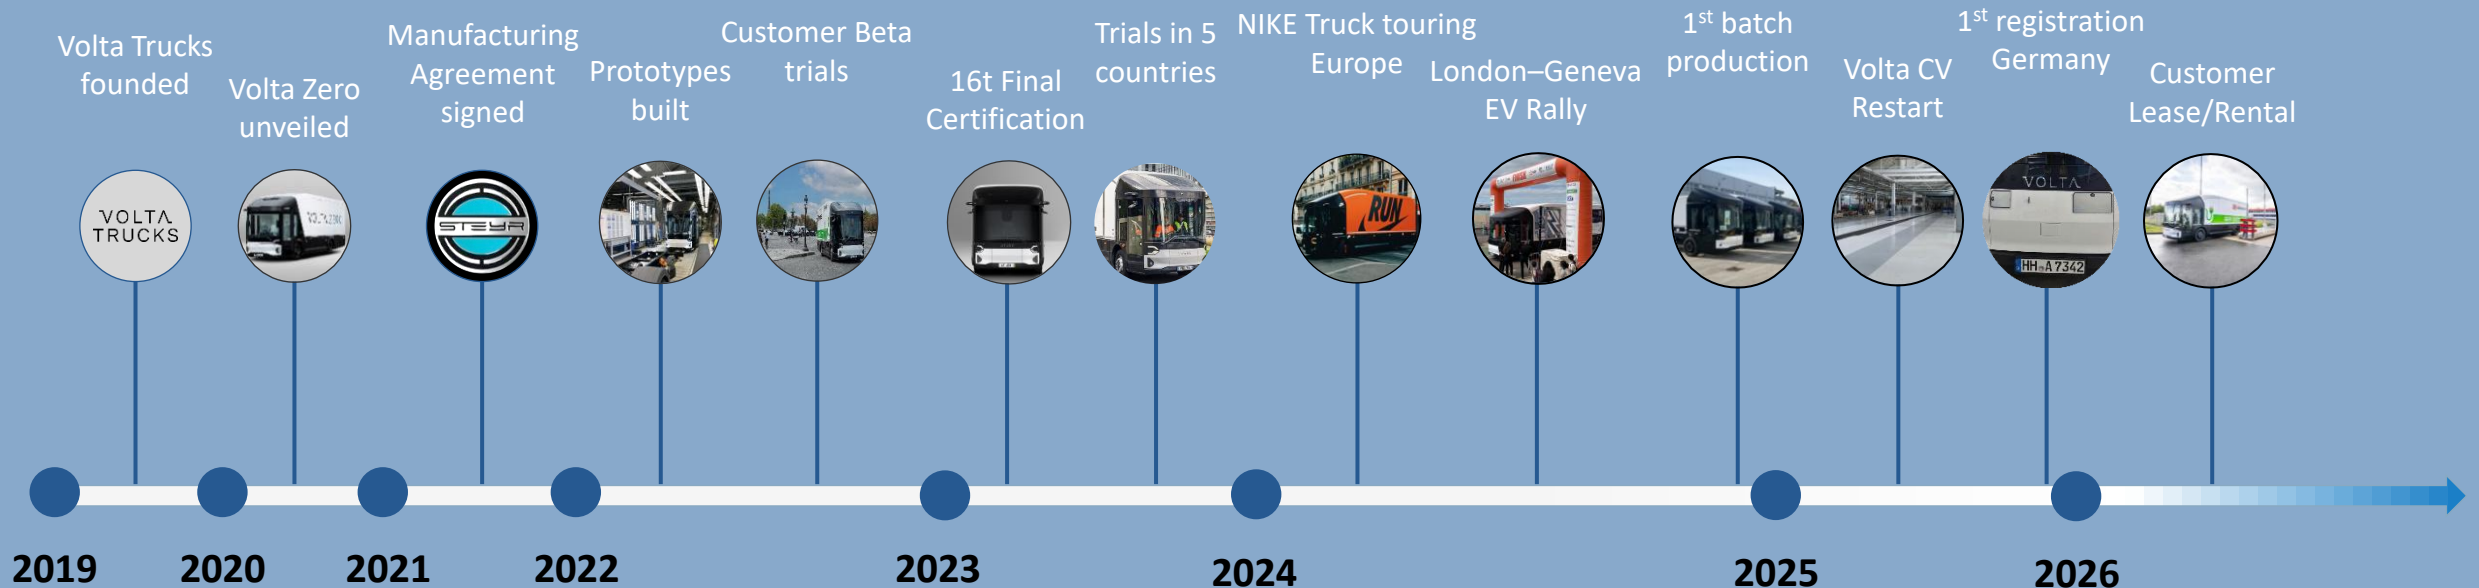

- After the parent company went into administration, several employees of the company got together with some key suppliers and majority investor LSL Technology Co. Ltd to save this iconic vehicle. A limited number of the original Volta Zero vehicles are now available for sale and trial.

- They are also working on the next generation truck which will benefit from a more competitive globally sourced supply chain, while keeping the European DNA and assembly that make the original truck so highly rated by leading European logistics companies.

Company History & Timeline

- Company founded in 2019 in Sweden by 2 Swedish entrepreneurs with the goal to develop sustainable and safe city transport mobility solution
- Concept design, development, engineering carried out in the UK
- 16-18t Rigid truck dedicated for city and urban environments developed with focus on efficiency, safety & enhanced direct vision
- Production in Austria – Steyr Automotive with decades of experience building EU heavy duty trucks
- 2026 re-engagement with Customers

Volta Zero Innovation

01

SAFETY DESIGN

- **360° cameras** minimizing blind spots
- Best direct vision: Centralized seating with **220° vision** from a glasshouse cab maximizes visibility
- Sliding doors for safe and **quick entry / exit** on both sides
- **Battery safely placed** between frame rails to protect from side impact

02

PERFORMANCE DESIGN

- 2-pallet wide box for **large payload**
- **100% electric**, zero-emission drivetrain
- Battery, motor, and e-Axle **under cargo load** allowing for redesigned cabin
- **More than 260 km** range suitable for urban applications

03

EXPERIENCE

- Purpose built design for **urban distribution**
- **Driver-centric design** & simple interfaces, increases comfort and expands driver pool
- **Interactive cabin**, simplified for improved safety
- **Low cabin** makes for easy ingress and egress without climbing, therefore **reducing the risk of injuries**

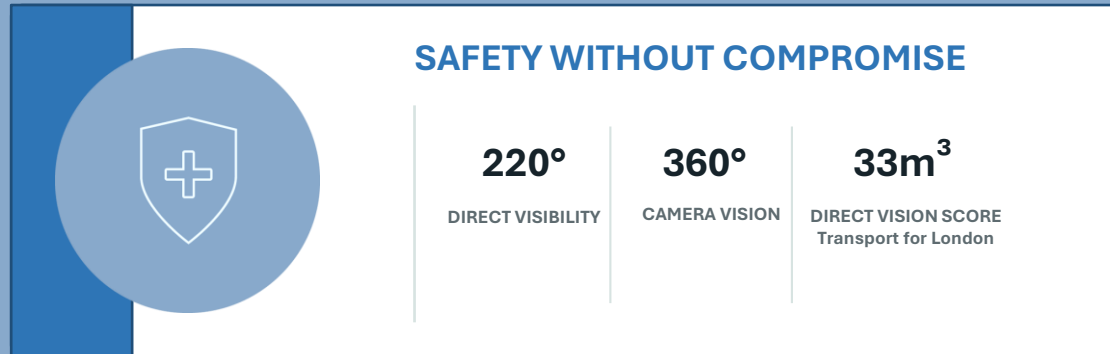

04

PURPOSE-BUILT

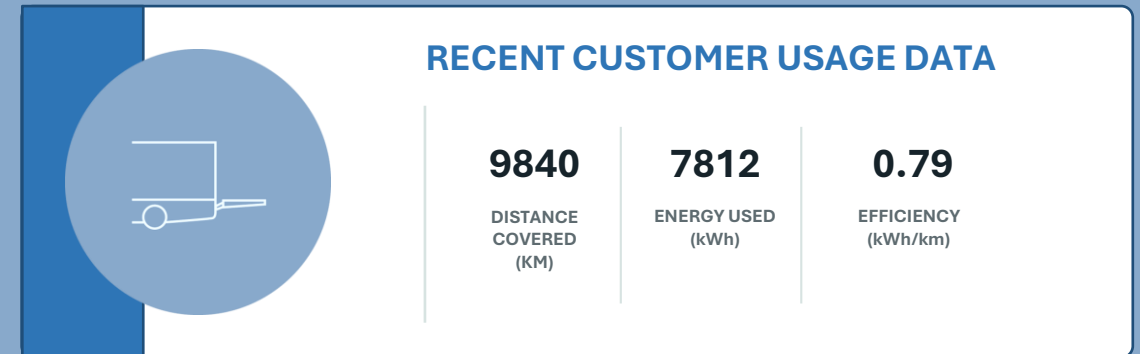

- **Light chassis** improves payload
- **Independent front suspension** improved ride comfort and wheel cut giving reduced turning circle
